RULES AND REGULATIONS

In consideration of Diversified Water Utilities, Inc. furnishing water, I, the Customer and/or Responsible Party, agree to all the Arizona Corporation Commission (“Commission”) general orders as defined in the Rules and Regulations relating to the operation of Domestic Water Utility Companies, and to the following pertinent rules listed below:

1. Each customer shall be responsible for maintaining all facilities on the customer’s side of the point of delivery in a safe and efficient manner and in accordance with the rules of the State Department of Health.
2. Each customer shall be responsible for safeguarding all utility property installed in or on the customer’s premises for the purpose of supplying water to that customer.
3. Each customer shall exercise all reasonable care to prevent loss or damage to utility property, excluding ordinary wear and tear. The customer shall be responsible for loss of or damage to utility property on the customer’s premises arising from neglect, carelessness, or misuse and shall reimburse the utility for the cost of necessary repairs or replacements.
4. Each customer shall be responsible for payment for any equipment damage resulting from unauthorized breaking of seals, interfering, tampering or bypassing the utility meter.
5. Each customer shall be responsible for notifying the utility of any failure identified in the utility’s equipment.
6. Each customer shall grant adequate easement and right-of-way satisfactory to the utility to ensure the customer’s proper service connection. Failure on the part of the customer to grant adequate easement and right-of-way shall be grounds for the utility to refuse service.
7. Each utility shall have the right of safe ingress to the egress from the customer’s premises at all reasonable hours for any purpose reasonably connected with the utility’s property used in furnishing service and the exercise of any and all rights secured to it by law or these Rules.
8. When a utility discovers that a customer or his agent is performing work or has constructed facilities adjacent to or within an easement or right-of-way and such work, construction or facility poses a hazard or is in violation of Federal, State or local laws, ordinances, statutes, rules or regulations, or significantly interferes with the utility’s access to equipment, the utility shall notify the customer or his agent and shall take whatever actions are necessary to eliminate the hazard, obstruction or violation at the customer’s expense.
9. Water furnished by the utility shall be used only on the customer’s premises and shall not be resold to any other person. During the critical water conditions, as determined by the Commission, the customer shall use water only for those purposes specified by the Commission. Disregard for this Rule shall be sufficient cause for refusal or discontinuance of service.
10. Where the meter or service line location on the customer’s premises is changed at the request of the customer or due to alterations on the customer’s premises, the customer shall provide and have installed at his expense all piping necessary for relocating the meter and the utility may make a charge for moving the meter and/or service line.
11. Each utility shall make reasonable efforts to supply a satisfactory and continuous level of service. However, no utility shall be responsible for any damage or claim of damage attributable to any interruption or discontinuation of service resulting from:
 - a. Any cause against which the utility could not have reasonably foreseen or made provision for, i.e., force majeure;
 - b. International service interruptions to make repairs or perform routine maintenance.
